## Curing Cancer with Carrots

In 2013, Ann Cameron cured Stage 4 colon cancer without chemotherapy or radiation, by drinking carrot juice. Since then, others with a variety of cancers have reported similar successes. Cameron wanted to find out why such an apparently simple cancer cure--just carrots--works.

Based on her extensive reading in scientific journals focused on nutrition and cancer, her ground-breaking book describes the details of the carrot treatment and the scientific evidence for its power.

In this book, she shares little-known research that is revolutionizing scientific thinking about cancer and how to treat it. The research comes from the exciting new field of epigenetics--the study of how chemical switching mechanisms in our bodies change the expression of our genes. Our environment, the foods we eat, and the way we live can silence pro-cancer genes or turn them on, set anti-cancer genes on alert or turn them off.

Genes aren't our destiny. Neither is cancer.

Cancer develops when the body loses its ability to recognize and eliminate rogue cells--cells that take over the body if they don't quit dividing. In some cases--probably many--carrots can restore the body's natural power to regulate growth and kill defective cells.

The scientific information in this book could be a life-saver and a beacon of hope for you or someone you know. Equally helpful, it offers the practical knowledge Cameron gained from her journey through cancer and back to health--how to use the internet to research proposed treatments and the quality of hospitals and doctors; how to reduce the cost of cancer care; and how to arrive at individual treatment decisions that are best for you.

Living Proof!

By Maria Oliver

So glad Ann wrote this book to help spread the word. Was healed of Lymph node cancer in the throat after juicing 5lbs. of carrots a day for about a month. Was going to have to have surgery, radiation, and possibly chemo when first diagnosed. I had to go through several months of back and forth testing with the doctors who, not all but most, refused to accept that they were gone without traditional treatment. Have doctors in the family and not at all against western medicine but think they need to be more open to the healing power of nutrition. When dealing with cancer there are many factors to consider and I wouldn't tell somebody not to take your doctor's advice on cancer treatment but also don't be afraid to try a glass of freshly juiced carrots to boost your chances of success. The power of nutrition is not being promoted enough today in the medical community in my opinion. Thank you Ann!

This book is excellent! I thank God for putting Ann in my ...

By meli rodz

This book is excellent! I thank God for putting Ann in my path and encouraging me to continue with my juicing. I agree with everything written in this book. I wasn't given a good prognosis by doctors and was given 5 weeks of radiation from stage 3b- 4 cancer and refused chemo & no surgery, during this time I juiced large amounts of carrots, ginger, and celery (4 cups a day- 32 oz) .. along with a vegetarian diet and turmeric supplement and was completely clear of cancer. I encourage everyone to juice carrots & do meditation/ rest and have faith that there is a way and there is a higher power that wants you well. This book is evidence of how commitment and determination can naturally heal your body. Best wishes!

Excellent, thought provoking look at modern cancer treatments

By Jonathan Ater

This is a beautifully written, well documented, and balanced look at modern cancer treatments. It is far more than the author's remarkable personal story. She explains how and why the natural compounds in carrots (and some other natural foods) combat the growth of cancer cells and even encourage those cells to self-destruct. She also explains how chemotherapy and radiation work, in simple language that any reader can understand. Ann Cameron may well be cured of her cancer. In this book, she gives every reader both information and tools to help think through the implications of a cancer diagnosis.
