Powerful lessons in this book but you must have some understanding of what culture is to be able to apply them.

By Robert Lara

Barry Phegan consulted with one of my previous employers 25 years ago and even though I didn't totally understand what he and his colleagues were trying to teach us we were able to develop our plant culture to achieve better business results in a very warm and nurturing work environment. As I better understood what cultures were all about, I have seen how powerful developing human relationships, particularly between

management and employees, can be in creating high achieving teams. It's the application of one of Colin Powell's leadership tenets that the art of leadership accomplishes what the science of management says can not be done. It's leadership that can create that high performing team culture.
