What's Your Design?

By Julie Clayton

Imagine a recipe for understanding your true nature, drawn from four ancient wisdom traditions: one part astrology, one part Kabbalah, one part I Ching and one part chakra system. Mix them together in a vat of science and spirituality and voila: you have the Human Design! A system and set of tools for realizing the mechanics and code of our authentic self: one we carry through life.

Over the decades I have had, perhaps, a dozen readings from astrologers, psychics, and palm readers, as well as having dabbled on my own in numerology, face reading, tarot cards, the Enneagram and other systems for self-awareness. Each has been useful, insightful, and revealing in its own way, and in spite of the differences of each model, there remains a constant thread of personality traits, inclinations, predispositions, potentialities, and behaviors that I recognize as "me." Consequently, this is my metaphorical litmus test for any new model or system for self-realization: do the insights resonate with what I have previously learned and intuitively know about myself?

Human Design definitely does resonate, and what's more, there is something quite magical about how it invigorates the soul. I literally felt--and continue to feel--more energetic, and have gained more clarity about who I am. New awareness gleaned from just a few hours of reading the insights my "design" offers continue to bounce around in my psyche, inspiring and affirming my thoughts and feelings. I can only imagine how much more powerful a reading would be.

It might be more accurate to say that most of what I learned was not new to me, but presented in a new light, one that makes sense and speaks to my soul. As a "new system" for self-understanding, it takes some time to absorb the layers of traits presented from the "9 centers, 36 channels, and 64 gates" that make up the life chart. But for me, it was "zone time:" timeless and completely absorbing. I wrote out several pages of notes on my life chart, which in itself will offer another layer of insight when I return for another dose of the inside story: what did I choose to notice and focus on--or not?

Human consciousness is becoming more clearly aware of itself; it's evolving. Human Design is a reflection of that evolution, mirroring the movement and sophistication of what I call "the art of being human."

A good introduction to an incomplete esoteric system

By TruthAndBeauty

I was initially floored by the insight offered in Chetan Parkyn's book. My individualistic approach to life, frustrating split between intellectual and professional pursuits and masked emotional nature were clearly delineated in this easy-to-follow introduction to the Human Design System. When I pulled up the charts of former romantic partners - who on the surface of things shared few similarities - they fit a particular compatible Design profile. Similarly, relationship charts accurately displayed both magnetism and challenges.

My appetite for Human Design whetted I spent a few months learning how to read 'body graphs', taking courses on HDS, analyzing charts of friends and family and exploring having readings done by different analysts. I have an enthusiast's working knowledge of astrology, i ching and the chakra system and was quickly able to identify how these influences were incorporated into Parkyn's book - which is heavily tilted to astrological analysis.

Ultimately, I found HDS exceptionally valuable for a snapshot of relationship dynamics and less so for the complexity inherent in individual personalities. In terms of providing practical guidance in life path and decision-making processes it is simplistic. Each HD analyst was fiercely loyal to his or her own school -

some in starry-eyed cult fashion. Their recommendations and guidance often differed, one pushing me to change my career path and commit to her expensive life coaching program. Other analysts, perhaps more ethical, validated my life choices. And so on.

I'm perhaps going into more detail than necessary but there isn't much online reviewing Ra Uru Hu's work or experience with the Human Design community as a whole. For clarity I didn't take courses from the author though one of the analysts I tried was one of the author's certified students.

All in all, this book is a fun introduction to HDS. Enjoy it, use it as a self-development tool and play around with Centers, Channels, Gates and especially Design Profiles ... but don't drink the Kool-Aid.

The Gift of Design

By Lucidity

If I had been in the library or online when I saw this book, I probably wouldn't of bought it. The same situation cannot be said for my aunt though who purchased the book for me as a Christmas present. I have spent a good deal of time in the past couple years searching for my purpose in life and how that can lead me to my ideal job. My aunt purchased this book in hopes that I could gain a little more knowledge about myself and what I needed to accomplish. It's amazing to me how often I can ask life a question and receive back a valid response from it.

It took me a few months before I decided to start reading Human Design since I had a stack of other "interesting" material to go through. Eventually the day came when I had the house all to myself, so I grabbed the book from the stack, sat down on my futon and jumped right in. Chetan Parkyn begins the book by explaining where the concept originated from and how it works. I usually don't scrutinize where the concept comes from whenever I read metaphysical self-help books that deal with subjects like numerology, astrology, etcetera, as long as the program is accurate with whatever it is trying to explain. After reading this section, Parkyn asks the reader to go online to download a small file that will calculate the type of person you are by taking your date, time and location of your birth. I continued reading after receiving the chart that explained my conscious and unconscious traits and became completely entranced by the material of this book. For the past 5-7 hours I wouldn't leave the bed unless my stomach was gruesomely pleading for some sort of food. I first searched through the pages to learn about my conscious characteristics, the things I already knew, and the material seemed accurate and helpful. I then went on to the unconscious characteristics, but I wasn't excited to read about them because I believed they wouldn't be as impacting as the previous material. When I started reading about my unconscious traits, I felt like I was engulfed in information that had been a part of me all this time. It's almost like sitting down with yourself while he explains who you are, but what you didn't realize. This part of the book really helped me with understanding myself and it gave me this type of energy and enthusiasm that wasn't there before. Let me just say that before this, I had a huge problem going out into public places such as restaurants. I always felt like EVERYONE was starring at me and it bothered me a lot. Almost so much that I wanted to leave the place as soon as I walked in. After I read this book, that problem and others in my life completely disappeared. I knew who I was, I acted like myself and became satisfied with the situations I was put in. This book brings so many things to the table and allows people to address the important things about themselves when it comes to personality. If you have any questions about who you are or need a helpful book that will keep your head up, Human Design is worth the price and effort. It will make you feel different. It will make you feel like... yourself.
