You don't need 6th edition

By Kevin W.

I got this instead of the 6th edition. It served me just fine. The changes between the editions are very minimal, mostly just different colors in the diagrams.

One of the best physiological textbooks worldwide

By Jiri Kofranek, M.D., Ph.D.

It is one of the best physiological textbooks worldwide. This textbook supports integrative system view of the complex function of the human organism.

This textbook is suitable not only for medical education, but also for the teaching of bioengineering.

Really, this book proved useful in teaching my students at the Czech Technical University, all the necessary chemical, anatomical, histological assumptions are well and clearly explained.

Dr. Jiri Kofranek, Associate Prof. of Pathophysiology, Charles University in Prague, Associate Prof. of Technical Cybernetics, Czech technical University in Prague

Missing Information

By marlene hancock

I ordered this book as a rental, because it was the best deal I could find. It was supposed to have Mastering A & P access with it, but it didn't. There was no Mastering A & P access code anywhere. I had to go ahead and purchase it at the last minute, because I was out of time. My class had already started, and I needed the textbook and the MAP. I haven't had time to try to find a phone number or an email anywhere to contact you guys about it. I had to get the Mastering A&P on my own, which was another \$66. I ordered this book from you, so that I wouldn't have to pay that extra \$66. For as much as I paid for the rented textbook from you, and the MAP's \$66, I could have had the set from the bookstore where I go, for the same amount of money, plus I could have had it immediately, plus I could have owned the book. Please let me know who to contact about this. Thanks. Marlene Hancock
