Get practical advice on tools and materials, and learn the right way to melt and fuse the cut ends of your cord. Whether you're camping in the wilderness, working outside, attending a game, or just walking the dog, you're sure to find the ideal DIY project here.

- 10 easy projects for lanyards, straps, wraps, slings, and more
- Survival bracelets that come apart quickly to provide emergency cord
- Practical gear for outdoor sports and recreation
- Detailed instructions and step-by-step diagrams
- Ropecrafting advice for knots, fusing, tools, and materials

## About the Author

Pepperell Braiding Company is a leading manufacturer of craft cord products, including macrame cord and paracord.

Joel Hooks is a project manager at Pepperell Braiding Co., the world's leading manufacturer and supplier of parachute cord and accessories. Joel learned the basics of knot craft as a youth, camping with the Boy Scouts in his native Texas. At Pepperell, Joel has been immersed in all aspects of parachute cord—from operating the machines that make it, to giving demonstrations on knot tying, and everything in between.

Rip off of Stormdrane's Blog and others!!!

By Browncoat Charlie

I liked these projects the first time... when I saw them on Stormdrane's Blog. None of these ideas are new. It is an unwritten rule in paracord culture to state where one found the project; example Stormdrane, JD Lenzen, Todd Mikkelsen, etc. I can find most of these ideas on Stormdrane's blog: flashlight wrap, turks, lanyard, fob... the list goes on and on! I also didn't like how the author assumes the reader will know how to end the projects. Also, almost every chapter refers to reader to another page to find the weave. I hate these kind of books. I wish I knew this before I bought it. I would not have wasted my money.

I Returned The Book

By Cynthia J. Tenney

I was most disappointed by the small number (12) of actual projects. It went over about 18 different knots but not in step by step fashion. The simpler knots were no problem but the more complex knots were shown in loose form. An intermediate to advanced paracorder could follow them, but overall, this book was just not what I was looking for.

55 of 59 people found the following review helpful.

Infomercial for commercial tools.

By Ben Rondeau

Really not much substance. A few projects, that's all. I really dislike the use & recommendation of tools where NO instruction is given as to how to make them. Reliance on commercial jigs? Really? Is this a book or an infomercial? Given its failings, I can't recommend it. Find another source, one that's more complete.
