Review

J.L Bourne is, hands down, one of my favorite authors. *Tomorrow War* is dystopian fiction at its best! The book is so real, it scared the hell out of me. Read it today and pray to God it doesn't come true tomorrow. (Brad Thor, #1 New York Times bestselling author of *Code of Conduct*)

"A nonstop action thriller that explores the dark side of 'what if' our entire digital and economic grid collapsed. An unforgettable novel." (SCOTT MCEWEN, #1 New York Times bestselling co-writer of *American Sniper* and *Target America*)

From the Author

This is not a novel about zombies, or at least undead zombies. For that tale, please point your e-readers or feet to my *Day by Day Armageddon* series. Although we are not overrun by real living dead (yet), some experts say the world economy may be on the brink of collapse. In a few moments, I hope you will embark on a journey down a similar dark road, one that wholly diverges from rosy predictions, gushing mainstream optimism, and suspicious government economic statistics.

What if this complex yet fragile socioeconomic system were to tumble uncontrollably like an animal on a frozen pond? Consider the Eurozone turmoil, the recent NYSE and United Airlines "glitches" and the frequent long periods of artificially frozen national debt. Complex systems cannot be controlled or even predicted; first world nations' leaders only perform in a political theater of public deception; someone is at the helm and everything will be fine, just be a good citizen or subject and go back to your favorite sitcom, football team, or reality TV program.

At the time of this novel, elected leaders are calling for abolition of our debt ceiling, draconian gun control, the use of armed drones in the skies above us, banning history, and are openly engaging in warrantless NSA pilfering of our private e-mails, text messages, persons, and effects. Where might this dangerous road lead? Has it ever been about your safety and security? The thought crime ahead goes beyond the paradigm of right, left, Democrat, or Republican, the outdated behavioral placement control mechanisms, forcing us to choose between two heads of the same serpent.

I had high hopes.....I was not disappointed.

By Andrew Parks

In a departure from his zombie fiction roots, JL Bourne delves into a not-too-distant future where the mightiest nation on earth is brought to it's knees in a matter of weeks. Fans of apocalyptic-scenario fiction will not be disappointed. The writing flows very well and I found myself vividly imagining Max's experiences as they happened. This novel highlights in excruciating detail what a complete breakdown of societal order would look like and it's not a pretty picture. Friends turn on friends. Law and order collapses. One finds himself wondering what he or she would do in the same scenario if faced with a totalitarian regime that controls all aspects of life. How far would you go to stand up for what you know is right? Tomorrow War examines that question in an action-packed work that left this reader examining how I could better prepare to take care of my family. I can only hope that this work of fiction does not play out in real life. If it does, consider yourself adequately warned.....

Enjoyable

By S. Morgan

Interesting survival fiction. The speed of the collapse was surprising, but not unbelievable. The authors detailed explanation of weapons was spot on, and his knowledge of the military is obvious. The main characters were sufficiently developed and the story moved along quite well. I did find a freight train full of needed food and supplies, virtually untouched while sitting in in the midst of starving people, to be a stretch. Otherwise, I thoroughly enjoyed the story.

I love Bourne's other books and looked forward to reading this

By M&E DeBarr

Extremely unrealistic and disconnect between protagonists training and plot.

Spoiler alert.

I love Bourne's other books and looked forward to reading this. However, when he tries to convince us that some people are rioting in the streets less than three days into the "meltdown", I mean come on. And the main character was supposed to be a bad ass CIA/NSA operative but has hand wringing discussions with himself about shooting obvious bad guys? His partner in crime lives in a train 30 ft above the road, and the evil military and/or the RIOTERS wouldn't think to go through the train weeks after the meltdown? I'm not sure what other people read, but this was a complete waste of my time.
